- Complies with '98 IMC shroud code
- Can bring existing shrouds to code

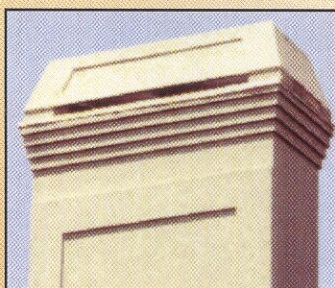

TS345 Termination cap

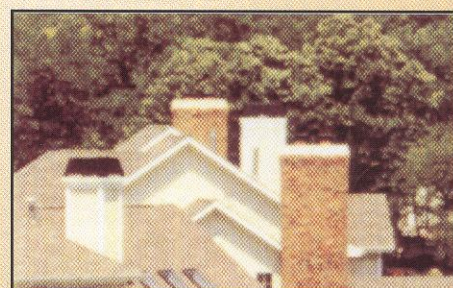

TS345 Termination cap with shroud

Pre-finished aluminum, Regal[®] style shrouds with standing seams.

Stucco-ready, Monarch[®] style shroud with built-out reliefs.

Shrouds help blend sided and brick chases nicely.

HEATILATOR FIREPLACES

"Beautiful inside, architectural freedom outside."

HEAT-N-GLO

No one builds a better fire

SALES UPDATE #1 – February, 1999

SHROUD OF SECRECY:

Chimney shrouds are a popular architectural feature in many markets today. We would be remiss however if we didn't remind you that use of any untested or unlisted chimney shroud could hinder the proper operation of a fireplace and would most likely void the warranty on that particular installation.

We do recommend a source for chimney shrouds, which have been tested and approved for use with our SL 300 and 400 wood chimney, systems as well as our D and SL D-Series gas flue components. That source is Chimney King. They can be contacted for more information at 847-244-8860.

WOOD PRODUCT UPDATE – August, 1999

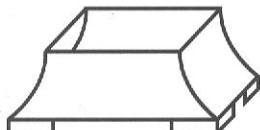

They're Here!!!

CUSTOM SHROUDS:

The 1998 International Mechanical Code now requires that all chimney shrouds be UL listed for the factory built fireplace they are being used with. Chimney King, manufacturer of custom chimney shrouds, has gotten UL listing with Heat-N-Glo woodburning fireplace systems. This will put you two steps ahead of the competition. The Heat-N-Glo woodburning termination cap models **HTS-345, HTS-445, HTR-344X and HTR-444X** are all listed with specific Chimney King shrouds. We will not offer the shrouds but we can direct you to contact Chimney King to order your own shrouds at (847) 244-8860 or E-Mail at Chimneyking@yahoo.com.
